BETA TESTER PROGRAM!

- PME Technology for cell-free nucleic acid preparation
- Extremely easy-to-handle, highly efficient method that saves considerable time
- Postive tested for serum, plasma, urine and cell culture supernatant
- Different fields of applications

NEW TECHNOLOGY

Cell-free DNA sizing

Extraction of Cell-free DNA in user-defined fragment sizes
e.g.: set cut-off – like 300 bp – and extract fractions up to 300 bp and/or >300 bp separately

Cell-free RNA

Extraction of microRNA from up to 5 ml of starting material
e.g.: serum, plasma, cell culture supernatants or mediums and other cell-free body fluids or urine

**Join now beta tester
and get the following
advantage...**

provide us with qualified feedback
within 6 weeks after sample kit
receipt and get 50 % of the list
price on your first order.*

* validity: 6 months

Choose your kit of interest (please mark) and sent the sample kit to the following address:
